

Ariadne Ariadne is a Web magazine for information professionals in Higher Education based in the UK and worldwide. Ariadne is provided by the University of Bath Library to inform policy-makers and practitioners in Higher Education libraries and associated sectors of developments in the online environment. Since its launch in January 1996 by UKOLN it has attempted to keep the busy practitioner abreast of current digital library initiatives as well as technological developments further afield. It concentrated originally on reporting in depth to the information community at large on progress and developments within the UK Electronic Libraries Programme covering matters such as information service developments and information networking issues worldwide.
